

Cost-effective Emissions Control for WTE and Biomass Projects

UltraCat Ceramic Filtration from Tri-Mer provides the highest levels of NO_x, particulate and SO_x reduction, plus:

- ▶ Modular design simplifies future capacity increases and changes in future emissions regulations
- ▶ Zero catalyst degradation
- ▶ Widest operation range: 300-1600° F
- ▶ Continuous operation with online maintenance
- ▶ Completely dry; no water consumption
- ▶ All-in-One Multi Pollutant System; no interfaces
- ▶ Preferred technology to Baghouse/SCR or ESP/SCR solutions
